Full Verbal Description

There are 5 fragments from this worked long bone from a medium-sized mammal. The largest measurements are above. The others are:

	length/height	width	thickness
b	3.23 cm	0.78	0.37
c	4.30 cm	0.88	0.28
d	1.94	0.68	0.28
e	1.53	0.61	0.24

The 5 fragments fit together, but the joins are tenuous, and there is at least one piece missing. I have not glued this, nor will I draw it. The piece has one end broken in antiquity; the other end was cut, and the sharp edges smoothed and rounded off. The bone's exterior surfaces are smooth, but neither glossy nor slick, even on the worked end. Use is unknown.
